Text

Goals, Objective and Outcomes
The course introduces students to the earth’s environment which includes land, air and water and how it varies spatially. People interaction with their environment not only an essential part of the course but also represents the main theme of geography. Students are expected to learn the general features of the physical environment and how people interact and adapt to different types of the physical environment.

Introduction
What is Geography.
Geographical Tools------------------ (Chapters 1 and 2)

Physical Geography (Environment)
