GEOL 10000 – Introduction to Geology Syllabus (Summer 2017)

Instructor: Tom Carboni
Monday and Wednesday 9:30am – 12:38pm
Hunter North, Room 1021
6/5/17 – 7/12/17

*This course will fulfill the Common Core Requirement for category D, Scientific World.

My Office: Hunter North, Room 1032 (ring doorbell)
Office Hours: TBD
E-mail: Thomas.Carboni72@myhunter.cuny.edu
Department Office: 1006 Hunter North

Contact Policy: In order for me to respond to your emails as efficiently as possible please adhere to the following instructions: (1) Include the course name and number in your subject line. (2) Include your entire name as it appears in CUNYfirst in your email (3) Email me from your @myhunter account. I try to answer all emails within 24 hours. Allow for a 48 hour delay on the weekends.

Brief description/purpose of course: This course will be of interest to any student who wants to learn more about the Earth as well as to those contemplating a major in Geography or Environmental Studies. The lecture meets 2 days a week for about 3 hours each day. Remember, this is an intensive course in a shortened summer session. You MUST keep up with the material on a daily basis. The lecture will cover the formation of the Earth, minerals, rocks and the rock cycle, plate tectonics, geophysical properties of the Earth, earthquakes, volcanism, the structure and formation of the sea floor and mountain building, all in the framework of vast geologic time.

Under the Hunter Core Requirements this course satisfies D, Scientific World. This course also fulfills the Stage 2 group E of the General Education Requirement (GER). Combined with GEOL 10100, this course satisfies one of the core requirements for the “new” geography major. For Psychology majors, the course, combined with GEOL 10100, satisfies one of the laboratory science requirements.

Required textbook:

OR

*The 5th edition can be rented on Amazon for $42.50 while the 4th edition cannot
**Expected Student Outcomes:** At the end of the course the successful student shall be able to:

- Describe the formation of our universe and our planet
- Describe Plate Tectonic Theory
- Describe how particular geologic features form
- Explain mineral formation, properties, and methods of identification
- Describe the Rock Cycle and how each type of rock forms
- Understand and be able to interpret geologic hazards
- Recognize geologic structures
- Discuss geologic time and Earth History
- Identify human impacts on climate

**Course Grading Summary:**

- Exam 1: 20%
- Exam 2: 20%
- Final Exam: 25%
- Homework (Chapter Quizzes): 25%
- Attendance and Participation: 10%

**Exams and grades**

a) Letter grades are given based on Hunter College’s official grading policy: [http://catalog.hunter.cuny.edu/content.php?catoid=15&navoid=1433](http://catalog.hunter.cuny.edu/content.php?catoid=15&navoid=1433)

b) Examinations 1 and 2 are 1 hour and 15 minutes. The final exam will be 2 hours long. All exams must be turned in promptly. If you arrive late, you lose that time.

c) Make-up exams are ONLY available in extreme cases, and with medical (or other) forms that confirm the absence.

d) I will agree to the CR/NC option only if the conditions stated in the CR/NC form are satisfied: all course work has been completed, you fulfill the attendance requirements, and you earned grades such that you accumulate at least 50 points total in the course. Students on probation are not eligible for this option. You must submit the CR/NC form before you sit down for the final. Requests for CR/NC as a final grade will not be accepted during or after the final exam.

**Homework:** There will be weekly homework assignments which are given to keep you up to date with the material. They will be given on blackboard and will pertain to the material gone over during the past week. Each chapter quiz will contain 15 questions which draw from the reading, powerpoint, or lecture. They will be due on Sunday at 11:59pm at the end of each week (except during the last week).

**Attendance and Participation:** Attendance is mandatory. It will be very difficult to learn all the material by yourself. Missing one summer class is equivalent to missing about two and a half classes during the regular semester. Therefore missing any more than one is going to affect your grade. Lateness and/or early departure will also be counted. In addition, participation counts towards your grade. Participation can include anything from asking questions during the lecture, lab, via email, before, and/or after class. The more you participate, the more interesting and interactive the class will be. You may as well take advantage and make the most of it.
**Classroom policies:** You are expected to have read the reading listed for each class day before class on that date. This will optimize your learning. Please be alert, attentive, and active in discussions. I do not want to repeat things ten times to those who were not paying attention. Give me respect while I teach and I will answer all the questions you have. Earphones are not to be worn in the classroom (either on ears or around neck). Laptops are permitted; however, I strongly suggest that you do not use a laptop in class but rather take notes by hand and/or listen attentively.

**Lecture:** I will spend part of the lecture time explaining the key concepts of geology. You are expected to devote time outside the classroom to understand the concepts, review questions given at the end of chapters in the textbook, or questions that I may ask in class. I expect that lectures will give you a clear idea of what is expected in the homework and exams. (Note: as a general rule of thumb for a college level course, you are expected to spend two hours outside the classroom for each hour in the classroom). Powerpoints will be posted on blackboard at least a day before the lecture on the topic will take place.

**Suggestions:** It is important to start with a good study habit. Consistency is the key. Forming study groups is extremely helpful. Use my time and any resource available to you throughout the semester. Make progress steadily as the material in this course cannot be understood the night before the exam. Concentrate on understanding rather than “regurgitating”. Put out your best effort every day!

The following are useful tips to do well in this or any class:

- Attend class and take detailed notes.
- Read the assigned material in the text (or other) before coming to class.
- Re-write your notes as soon as possible after class. This will allow you to fill in the details still fresh in your memory, and prepare questions for the next time the class meets.
- Test yourself by answering the questions in the book and in class.
- Carefully study the diagrams and charts in the book and in the lectures.

**Extra Credit:** No extra credit is given in this course. Whatever effort you would put into an extra credit assignment put into completing homework assignments and studying for exams. If I grant extra credit to one student, then to be fair I have to offer it to every student. If you have concerns about your grade please come and talk to me.

**Hunter College Policy on Academic Integrity:** Hunter College regards acts of academic dishonesty (e.g., plagiarism, cheating on examinations, obtaining unfair advantage, and falsification of records and official documents) as serious offenses against the values of intellectual honesty. The College is committed to enforcing the CUNY Policy on Academic Integrity and will pursue cases of academic dishonesty according to the Hunter College Academic Integrity Procedures.

**ADA Policy – Students with Disabilities:** In compliance with the American Disability Act of 1990 (ADA) and with Section 504 of the Rehabilitation Act of 1973, Hunter College is committed to ensuring educational parity and accommodations for all students with documented disabilities and/or medical conditions. It is recommended that all students with documented disabilities (Emotional, Medical, Physical, and/or Learning) consult the Office of AccessABILITY, located in Room E1214B, to secure
necessary academic accommodations. For further information and assistance, please call: (212) 772-4857 or (212) 650-3230.

X. Hunter College Policy on Sexual Misconduct
In compliance with the CUNY Policy on Sexual Misconduct, Hunter College affirms the prohibition of any sexual misconduct, which includes sexual violence, sexual harassment, and gender-based harassment retaliation against students, employees, or visitors, as well as certain intimate relationship. Students who have experienced any form of sexual violence on or off campus (including CUNY-sponsored trips and events) are entitled to the rights outlined in the Bill of Rights for Hunter College.

a. Sexual Violence: Students are strongly encouraged to immediately report the incident by calling 911, contacting NYPD Special Victims Division Hotline (646-610-7272) or their local police precinct, on contacting the College’s Public Safety Office (212-772-4444)
b. All Other Forms of Sexual Misconduct: Students are also encouraged to contact the College’s Title IX Campus Coordinator, Dean John Rose (jtrose@hunter.cuny.edu or 212-650-3262) of Colleen Barry (colleen.barr7@hunter.cuny.edu or 212-772-4534) and seek complimentary services through the Counseling and Wellness Services Office, Hunter East 1123.
